

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

Responsible Office

Enterprise for Research, Innovation and Knowledge

POLICY

Issued: 04/14/2009
Revised: 03/11/2025 (minor revision)
Edited: 10/15/2025

The Ohio State University conducts innovative research in many areas. The university fosters a research environment conducive to the creation and dissemination of knowledge for the public good. As part of this mission, the university continues to expand its research and other collaborative efforts with foreign countries and their citizens. The university also conducts research and commercial collaborations with industry and the federal government. All such activities may be subject to federal regulations covering certain exports with destinations and persons outside of the United States. In some cases, these regulations also apply to non-U.S. citizens at the university and within the United States.

Ohio State seeks to comply with applicable export control regulations in all university activities including innovative research and collaborative efforts to further the creation and dissemination of knowledge for the public good while simultaneously protecting national security, foreign policy, and the economy and commerce.

Purpose of the Policy

To outline the key features of export control regulations, examine the relationship of these regulations to activities conducted at the university, and explain how the university will assist personnel to ensure compliance with such export control regulations.

Definitions

Table with 2 columns: Term and Definition. Rows include Controlled exports, Deemed export, Exports (noun), Re-export, Defense Article, Educational information, and Export license.

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

Term	Definition
Export license exception	A written authorization provided by the appropriate regulatory authority detailing the specific terms and conditions allowing the export or re-export of controlled exports that would normally require an export license.
Foreign national	Anyone who is not a citizen of the host country in which they are residing.
Foreign person or entity	Anyone who is not a U.S. person (see definition below). Any foreign corporation, business association, partnership, trust, society, or any other foreign entity or group as well as international organizations and foreign governments.
U.S. person or entity	Anyone who is a U.S. citizen, a lawful permanent resident of the U.S., or has refugee or asylum status in the U.S., wherever that person is located. Also includes U.S. incorporated or organized firms and their foreign branches.
Fundamental Research	Any “basic and applied research in science and engineering, the results of which are ordinarily published and shared broadly within the scientific community...” is <u>not</u> subject to export control regulations under the Fundamental Research exclusion. See National Security Decision Directive 189 (NSDD 189). Research that contains publication restrictions or that contains access or dissemination restrictions <u>does not qualify</u> as Fundamental Research. See 15 C.F.R. §734.8 “‘Technology’ or ‘Software’ that arises during, or results from Fundamental Research,” 22 C.F.R. §120.10 “Technical Data,” and 22 C.F.R. §120.11 “Public Domain.”
Personnel	Faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all other persons retained by or working at the university.
Sanctioned and/or embargoed countries	Certain individuals, entities, and countries with whom the U.S. government actively restricts U.S. persons or <u>entities</u> from conducting interactions for a variety of reasons. The following departments all maintain and enforce separate blocked and sanctioned lists: 1. Department of Commerce, see Export Administration Regulations, 15 C.F.R. §746 “Embargoes and other Special Controls”; 2. Department of State, see International Traffic in Arms Regulations, 22 C.F.R. §126.1; and 3. Department of the Treasury, see Office of Foreign Assets Control sanctions information.
Prohibited party	An individual or entity who is on one of the lists published by the Departments of Commerce, State, or the Treasury.
Sanctioned transaction(s)	Transactions involving exports 1) to or within a sanctioned or embargoed country or 2) to entities or individuals from a sanctioned or embargoed country.
Technology control plan	Document generated by the Office of Secure Research (OSR) outlining the physical, information, and personnel security measures required to safeguard controlled exports.
Unit	Generic term for a department, program, institute, center, or other unit within a college or central office.

Policy Details

I. Background

- A. Since the 1940s the Departments of State, Commerce, and Treasury have regulated the transfer or release from the U.S. any export that has been deemed strategically important to the U.S. for reasons of national security, foreign policy, or the protection of the economy and commerce. These regulations are collectively referred to as ‘export controls’ or ‘export control regulations.’
- B. Many research, teaching, or service activities conducted by university faculty and staff are shielded from these federal regulations by a long-standing **Fundamental Research** exclusion, which is discussed in more detail below. Even though the Fundamental Research exclusion may apply to the university’s activities, all potential exports must be reviewed for applicable export control regulations and assessment under the exclusion.
- C. Failure to comply with the export control regulations may result in severe penalties to the institution, as well as criminal sanctions to those individual(s) involved. All personnel should familiarize themselves with this policy but especially the individuals working in the following areas:
 1. Engineering, physical and computer sciences (especially those involved in defense-related research);

University Policy

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

2. Biological sciences and medicine, including those working with select agents and infectious materials; and
3. Those conducting research or academic collaborations with colleagues in countries that have been designated as **sanctioned and/or embargoed countries** by the U.S. Departments of State and the Treasury.

II. Scope

- A. Exports and **sanctioned transactions** subject to this policy include but are not limited to:
 1. Activities or research in controlled areas (e.g., encryption technology, nuclear technology, chemical/biological weapons, and military technologies);
 2. Activities involving the shipping or taking of equipment, technology, or software outside the U.S.;
 3. Activities involving teaching and research collaborations with foreign colleagues or the participation or training of **foreign nationals** here or abroad;
 4. Activities involving travel or work outside the U.S.;
 5. Conducting tours of foreign nationals through research areas;
 6. Conducting research sponsored by any entity restricting publication or participation by foreign nationals;
 7. Performing works for hire, including testing services, educational services, etc.;
 8. Activities involving the receipt and/or use of export-controlled information or technologies from other parties;
 9. Activities involving the payment of **foreign persons or entities**;
 10. Hosting foreign national visitors;
 11. Activities related to the sharing, shipping, transmitting, or transferring of encryption software in source code or object code; and
 12. Activities including sharing, shipping, transmitting, or transferring any item, information, or software that will support the research, design, development, production, stockpiling, or use of nuclear technology, chemical/biological weapons, or missiles.

III. Federal Administration

- A. The Departments of Commerce, State, and the Treasury are the principal administrative branches of the U.S. government involved in the oversight and enforcement of export control regulations.
 1. The Department of Commerce, through the Bureau of Industry and Security, administers the Export Administration Regulations, controlling the export of dual-use items (i.e., items having both commercial and military applications) as well as strictly commercial items.
 2. The Department of State, through the Directorate of Defense Trade Controls, administers the International Traffic in Arms Regulations, controlling the export of items developed primarily for military or space applications.
 3. The Department of the Treasury, through the Office of Foreign Assets Control, enforces specific embargoes and/or sanctions.

IV. Compliance Roles and Responsibilities

- A. All personnel are responsible for ensuring their educational, research, and other business activities are conducted properly and in compliance with export control regulations, all requirements of this policy, and any **technology control plan** on which they are included.
- B. The vice president of research is the designated Ohio State Empowered Official as it relates to export control regulations. Other Empowered Officials may be appointed as needed.
- C. The Office of Secure Research (OSR) is responsible for oversight of compliance for all exports and sanctioned transactions.
- D. The export compliance officer (ECO) facilitates compliance with the university's responsibilities under export control regulations. Additionally, sponsored program officers, department administrators, **units**, HR staff,

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

Enterprise for Research, Innovation and Knowledge (ERIK) Innovation and Partnerships, and the Office of Legal Affairs (OLA) work in conjunction with the ECO to facilitate compliance.

- E. Failure to comply with export control regulations may result in substantial civil and criminal penalties to the university and the specific individual(s) involved, as well as administrative sanctions resulting in potential loss of federal funding and export privileges.

PROCEDURE

Issued: 04/14/2009
Revised: 03/11/2025 (minor revision)
Edited: 10/15/2025

- I. Export Assessments of Research and Collaborations
 - A. When requested, required, or necessary by procedure, OSR will assess or assist in determining if activities involving foreign nationals, entities, or countries are subject to export control regulations.
 - B. Typical export assessment determinations include:
 - 1. Whether or not an activity is controlled research or qualifies as Fundamental Research;
 - 2. A commodity jurisdiction determination (under which agency an export is regulated), a commodity classification determination (under which entry on the Commerce Control List the export is regulated and which countries/foreign nationals are restricted for export);
 - 3. A determination of whether an international collaboration or foreign exchange involves transactions subject to trade sanctions (including nationality and restricted party screening); and/or
 - 4. Whether any parties involved in the transaction require government authorization.
 - C. If an export assessment determines that an activity is subject to export control regulations, with **unit** approval, OSR will assist the affected party in seeking necessary **export licenses** or other government approvals (e.g., an **export license exception**), and/or recommend security measures (e.g., a transaction-specific technology control plan) or other documentation (e.g., certifications) needed to ensure compliance with export control regulations.
- II. Communicating with and Obtaining Export Licenses or Other Approvals from Governmental Agencies
 - A. Ohio State cooperates with those governmental agencies that have law enforcement and license responsibilities related to export control, sanctions, and facility security regulations.
 - B. The ECO serves as the university point of contact with those agencies.
 - C. OSR, in collaboration with OLA, will assist any units in filing for any export license or other government approval necessary to conduct a university approved activity.
- III. Export Classifications
 - A. When requested or necessary, the ECO oversees the classification of commodities, biologics, equipment, software, encryption, technology, and technical information that may be subject to export control regulation.
 - B. All classifications must be approved by the ECO; only those classifications approved by the ECO can be used to determine whether an export is subject to export control regulations, and whether an export license is required to complete the desired transaction.
 - C. An inventory of classifications is maintained by OSR.
- IV. Sanctioned Transactions
 - A. Sanctioned transactions are strictly prohibited unless they are vetted and approved by the ECO, department chair/director, dean, and vice president of research.

University Policy

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

- B. When necessary, transactions may be reviewed by the vice president and chief compliance officer, other senior university officials, and/or the University Risk Management Committee, with input from the requesting unit or ECO.
- C. Potential sanctioned transactions include, but are not limited to:
 - 1. Agreements and collaborations with [Entity List](#) organizations;
 - 2. Hiring faculty and staff from sanctioned and/or embargoed countries;
 - 3. Making payments to individuals or entities from sanctioned and/or embargoed countries; or
 - 4. Hosting visitors from sanctioned and/or embargoed countries and/or [Entity List](#) organizations.

V. Restricted Party Screening

- A. Any unit may request access to restricted party screening (RPS) software maintained by OSR.
- B. Requesting units must develop an internal process, with the assistance of OSR, to use the software to screen individuals, exports, and destinations.

VI. Foreign Nationals on Campus

A. Students

- 1. Publicly available information and **educational information** may be transferred to a foreign national student without an export license. Exports made to foreign national students related to prohibited end uses (e.g., nuclear technology, missiles, chemical and biological weapons, or other weapons of mass destruction) are not permitted. Units are responsible for ensuring that such transactions are not made to foreign national students.
- 2. Units must also ensure that foreign national students are not conducting research that is proprietary, has publication-restrictions, has foreign national participation restrictions, or that may be otherwise controlled under the export control regulations without first determining whether an export license is required, and obtaining an export license, if required, before access is given.

B. Visiting scholars

- 1. Unless a visiting scholar is a **U.S. person**, all exports involving that individual may be subject to export control regulations. Visiting scholars may not have access to any controlled export unless such transactions have been reviewed by OSR.
- 2. The inviting unit is responsible for notifying OSR that a visiting scholar will be on campus and requesting an export review of the proposed activities of that individual before access is given.

C. Employees and I-129 **deemed export** attestations

- 1. A hiring unit may screen prospective employees to determine if an individual is a **prohibited party**. Such screening should be performed through the use of RPS software, and a record of the screening should be maintained by the hiring unit.
- 2. An I-129 deemed export attestation may be required for certain visa types. The Office of International Affairs (OIA) is responsible for procuring all requested visas, and for notifying OSR when an I-129 attestation is required.
 - a. OIA may complete the I-129 attestation for candidates from non-sanctioned countries who will not have access to **controlled exports**.
 - b. I-129 attestations for candidates from sanctioned countries or for candidates who may have access to controlled exports must be completed by OSR with assistance from OIA and the proposed supervisor.
- 3. Supervisors who hire individuals from sanctioned countries must ensure that such individuals have no access to controlled exports during their employment at Ohio State.

VII. International Gateways

- A. Personnel employed by or acting on behalf of an International Gateway office are responsible for compliance with export control regulations, regardless of their citizenship or country of residence.

University Policy

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

- B. International Gateway directors/responsible administrators are responsible for ensuring that the activities of the gateway office comply with export control regulations.
- C. Upon request, OSR will assist with the review of any activities of the gateway office that may involve an export.

VIII. Purchasing, Payments, and Other Acquisitions

- A. Personnel involved in the purchase or acquisition of items, technology, and/or software are responsible for screening prospective and actual vendors, suppliers, and partners to ensure that those individuals and/or entities are not prohibited parties.
- B. Personnel must notify OSR if the university acquires (through purchase, donation, or any other acquisition) items which may be a **defense article**.
- C. Personnel involved in making payments to non-university parties are responsible for screening such parties using RPS software, and notifying OSR if there are any screening alerts.

IX. Shipping

- A. Personnel involved in processing shipments on behalf of the university are responsible for ensuring that a shipment is permitted under export control regulations.
- B. Personnel must ensure that a correct Export Control Classification Number (ECCN) or other required export number is indicated on the shipping documentation.
- C. OSR will assist personnel in determining the correct ECCN and any export license requirements, and completing required paperwork for all shipments.

X. Technical Data Security

- A. Personnel must abide by the [Institutional Data policy](#) (including the [Information Security Standard](#) and the [Information Security Control Requirements](#)), the [Information Technology Security policy](#), and the [Research Data policy](#) in the handling of restricted data.
- B. Personnel who receive, use, generate, store, and/or transmit export-controlled technical information classified as S4 restricted data under the [Institutional Data policy](#) (export-controlled S4 restricted data) are responsible for ensuring the security of such data.
- C. A technology control plan or an export certification form must be in place before any personnel may receive, use, generate, store, and/or transmit export-controlled S4 restricted data. Personnel who desire to work with export-controlled S4 restricted data should contact OSR to determine if such a plan is in place, or develop a plan if needed.
- D. When university information technology (IT) personnel become aware that personnel have access to export-controlled S4 restricted data, IT personnel should contact OSR to determine if a technology control plan or export certification form is in place.
- E. Personnel who receive, use, generate, store, and/or transmit, or otherwise have access to export-controlled S4 restricted data are required to have an RPS screening performed prior to having access to such data. These individuals may also be subject to a criminal background check in accordance with the [Background Check policy](#).

XI. International Travel

- A. Personnel traveling internationally on official university business must determine if export control regulations apply to their travel.
- B. Travelers may visit the [OSR website](#) or contact OSR for help in making such determinations.

XII. Restrictive Trade Practices and Boycotts

- A. The anti-boycott provisions of the Export Administration Regulations prohibit U.S. persons or entities from participating in any non-U.S.-sanctioned boycott of a foreign government. Participation in this context

University Policy

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

includes refusing to engage in business transactions with the boycotted country, agreeing not to use "blacklisted" suppliers from the boycotted country, or providing information related to business relationships with the boycotted country.

- B. Any U.S. person or entity who receives a request that supports a restrictive trade practice or boycott imposed by another country must promptly report the request to the Department of Commerce. Therefore, any personnel who are aware of a restrictive trade practice or a proposed boycott must report the occurrence to OSR and/or OLA. OSR will assist personnel in determining if the anti-boycott provisions of the Export Administration Regulations apply and reporting such occurrences to the appropriate authorities.

XIII. Training

- A. OSR will consult with appropriate units to assure provision of training necessary to the understanding of export control regulations and implementation of this policy.
B. OSR provides specific training for personnel involved in conducting controlled research and periodic awareness training tailored to the specific needs of a given unit.
C. Certain units may be required by OSR to complete mandatory annual training related to export control regulations, policies, and procedures.

XIV. Recordkeeping and Retention

- A. The university is required to retain a complete record of all export-related records including but not limited to the university's analysis of export license requirements, any issued export licenses, shipping documents, and any correspondence related to each export activity.
B. The ECO, in conjunction with OSR, must retain original records related to exports for five years from the date of export, re-export, or transfer.
C. Personnel are responsible for maintaining all export-related records for five years. Alternatively, personnel may forward all relevant export documentation to OSR for retention.

XV. Internal Assessment and Monitoring

- A. OSR will periodically assess and monitor exports and/or sanctioned transactions.
B. All findings will be reported to the vice president of research and to the vice president and chief compliance officer, as appropriate.

Responsibilities

Table with 2 columns: Position or Office, Responsibilities. Row 1: All personnel, 10 numbered responsibilities including compliance with regulations, reporting, training, and recordkeeping.

Applies to: All units and university personnel, including faculty, staff, visiting scholars, research associates and fellows, postdoctoral fellows, student employees, students, visitors, volunteers, and all others retained by or working at the university.

Position or Office	Responsibilities
	<p>citizenship status of university personnel who can legally access the information before sharing the information or item.</p> <ol style="list-style-type: none"> 11. Sign the Certification on the Handling of Export-Controlled Information if receiving export-controlled information or items; develop a technology control plan in collaboration with OSR if required. 12. Promptly report to OSR any activities or actions that are believed or known to constitute an export violation. <p>Data Security</p> <ol style="list-style-type: none"> 1. Ensure security of any export-controlled S4 restricted data received, used, generated, stored, and/or transmitted. 2. Contact OSR to determine if a technology control plan or export certification form is in place or needs to be developed prior to receiving, using, generating, storing, and/or transmitting export-controlled S4 restricted data. 3. Have an RPS screening performed prior to receiving access to export-controlled S4 restricted data. 4. May be subject to a criminal background check in accordance with the Background Check policy. 5. If you are IT staff, and you become aware that personnel have access to export-controlled S4 restricted data, contact OSR to determine if a technology control plan or export certification form is in place. <p>Shipping</p> <ol style="list-style-type: none"> 1.
